Clyde Smiths'' latest ProHipHop Project is out of Beta at WeeklyHipHopAlbums.com.

Working overtime, ProHipHop joins the Custom Search Engine Craze with World Cypher: Hip Hop Search Engine and Music Biz Search.

Weekly Hip Hop Albums has emerged from its not so stealthy launch as an ideal way to keep up with each week's new hip hop album releases. Each Sunday, a list of the week's new hip hop releases, along with the coolest album covers, is posted at the Weekly Hip Hop Albums weblog (weeklyhiphopalbums.com). Each Monday, newsletter subscribers receive the same complete weekly report with all the live links and album cover art in their email.

Though ProHipHop (prohiphop.com) has long produced an outstanding new hip hop releases report, Weekly Hip Hop Albums'' addition of great album cover art and its availability as a separate weekly newsletter has already made it a popular item with early adopters.

Not content to stop there, ProHipHop has launched two new search engines built with Google's Custom Search Engine technology. World Cypher: Hip Hop Search Engine (worldcypher.com) features high quality hip hop sites within a broader search.

Music Biz Search (musicbizsearch.com) searches only a select group of music industry websites and related resources.

About ProHipHop

ProHipHop is written by Clyde Smith and focuses on hip hop marketing and business news. ProHipHop is at the center of a growing network of hip hop business and culture websites that are leading the way in music industry web publishing.
