The 'theme' song is remixed into a hip-hop joint, done by down south crunk rap artist Bone Crusher and the classic show returns as a second season of the reality show.

Much different than its original comedy series. season two of The Real Gilligan's Island, and a second dose of comedy, outrageous competitions and island hook-ups. TBS has got two all-new teams of real-life castaways who are looking for a way off of the island...and into a boatload of cash.

The Real Gilligan's Island features two complete sets of castaways: two real-life skippers, first mates, millionaire couples, movie stars, farm girls and professors all competing to be the only castaway of his/her kind on the island. Once a series of elimination challenges have whittled the castaways down to one set, the remaining castaways will compete against each other to be the last man (or woman) standing and the winner of the grand prize.

The Real Gilligan's Island - All New - Premieres June 8th
