After the project was delayed; April 26th brings the new release from hip-hop/rap icon label Death Row Records according to Death Row Records CEO Marion 'Suge' Knight.

Legendary west coast recording figure Death Row Records (home of Tupac, Kurupt, Jewell, and many others), had officially announced the upcoming release of a new album entitled 'The Very Best of Death Row' for Feb.22nd.

The album will be distributed through Koch Entertainment.

The last official release from Death Row Records was 'Tupac Live'. Death Row pushed the release date forward 4 days for 'Tupac Live' because of bootlegging. It was released on the rap label this past August.

Due to the recent events that occurred with the latest Tupac release 'Loyal to the Game', bootlegging will most likely be a concern with this Death Row release also.

Support the west coast and Death Row Records and BUY the album; Pre-Order [HERE](#) .

Do not 'steal' it by downloading any early releases that may hit the internet.

Cover art and a track list for 'The Very Best of Death Row' will be coming soon.
