The legendary hip-hop rap D.I.T.C. crew which included members A.G., O.C., Buckwild, Diamond D, Showbiz, Lord Finesse and the late great Big L are still making great music and still has fans looking for more from them.

There is a lot going on with the D.I.T.C. crew and first some news on the O.C. 'Starchild' album from Grit Records:

"Aighh. Here is some news we were not hoping to announce. It is official as of Friday that the O.C. 'Starchild' album is internally shelved due to sample clearance issues stemming from 4 tracks from the import album that were going to be included on the re-worked North American version.

O.C. has an album called Rebel Music being released on Heiro that was due to come out in few months after being set up by the U.S. version of 'Starchild'. Unfortunately, this cannot happen as 'Starchild' will never see the light of day in the U.S. in its current state.

Given the inevitable cannibalization of both albums if 'Starchild' is released upon immediately clearing these songs, we have opted to shelve the album and rework from the ground up.

Due to this unfortunate set of events we have no choice but to pull the album and allow fans to enjoy Rebel Music and whet their appetite for the eventual re-configured version of 'Starchild'. The versions that you see being sold online will serve as the very last incarnation of this album.

'Starchild' will be reborn with new material and reconstructed with new vocals and beats by Pete Rock. This will be an un-cut version that will be the album we wanted D.I.T.C fans to have featuring production from some authentic underground producers.

I am very disappointed to keep this project on ice even longer. Fans that want the "dope album 2005 never heard of" then head to places like Hiphopsite.com, ughh.com and undergroundhiphop.com. Thanks to all the fans that supported it and showed love" - Grit
