On November 15, 2004 Rock A Mole Productions (www.rockamole.com) will release *Everybody In, Nobody Out*, a new film on musicians and health care. It's just six minutes long but it packs quite a wallop. It will be sent free on VHS to any musician or music writer who requests it. Everyone else, please send \$10 to RRC, Box 341305, LA, CA 90034.

From rap to hip hop to rock-n-roll we all should be able to get health care.

"What does it say about the richest country on earth that its citizens must depend upon raffles and spaghetti dinners to pay the medical bills--a situation that exists in no other civilized country? What does it say about members of Congress and presidents, Democrats and Republicans all, who are content with a health care system that ignores the needs of tens of millions of Americans while it makes multimillionaires out of those who profit from disease and death?"-from *Critical Condition* by Donald L. Bartlett and James B. Steele.
