

MTV Text Goes Interactive

Written by Keith ID437

Sunday, 21 November 2004 20:40 -

Data Design is pleased to announce the launch of a new Interactive Teletext Service, called Spit It Out.

It is an adaptation of the Spit It Out letters page which was so popular in the previous years - however it is now gone all technological and allows people to send their own messages direct to the text service.

So you could be watching the various shows on MTV (UK & Ireland) and see something funny, weird or want to comment to your mate about a song/performance and share the chat with a group. You could make some new friends who will also be watching at the same time - and chatting along with them too

For more information, go to MTV Text, choose Page 700 and read about it. Chat Rooms are open initially from 4pm daily. As usage increases we will open 24/7.
